APPARATUS AND METHODS FOR INTERACTIVELY DISPLAYING
INFORMATION RELATING TO A VEHICLE

ABSTRACT

Methods and an apparatus are provided for producing owners manual
information related to operation of a vehicle. The apparatus comprises a
5 display system, an input device configured to generate a control signal in
response to actuation by an operator of the vehicle, and a control module that
is configured to sense an event of the vehicle and generate an output signal
corresponding to the event. In addition, the apparatus further comprises a
display control module configured to receive the control signal generated by
10 the input device and the output signal generated by the control module. The
display control module is further configured to control the display system in
order to produce a visual representation of the owners manual information
related to operation of the vehicle in response to the control signal and the
outputsignal.
